DEMAND FOR PAYMENT  
NOTICE OF POTENTIAL RESPONSIBLE PARTY MEETING  
SENT FEDERAL EXPRESS

**URGENT LEGAL MATTER**

**Re: Denova Environmental Superfund Removal Site**  
**Liable Company Name: The Boeing Company**  
**Generator Name: BOEING CO**

Dear Harry C. Stonecipher:

Pursuant to the authority of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended by the Superfund Amendments and Reauthorization Act of 1986 ("CERCLA"), 42 U.S.C. §§ 9601, et seq., the United States Environmental Protection Agency ("EPA") has determined that there was a release or substantial threat of a release of hazardous substances, as defined by Section 101(14) of CERCLA, 42 U.S.C. § 9601(14), from the Denova Environmental Superfund Site ("the Site"). The purpose of this letter is to notify your business or organization of the potential liability, as defined by Section 107(a) of CERCLA, 42 U.S.C. § 9607(a), you may have incurred with respect to the Site, to demand reimbursement of response costs that have been incurred by EPA at the Site, and invite you to attend a meeting on September 16, 2004, to discuss settlement options to resolve your potential liability.

Site Background

The Site is located at 2610 North Adler Avenue, Rialto, San Bernardino County, California and operated as a hazardous waste and explosives storage and disposal facility. From September 18, 1981 to May 28, 2004, the facility was a permitted Interim Status Treatment Storage and Disposal ("TSD") facility by the State of California, Department of Toxic Substances Control ("DTSC") under the Resource, Conservation and Recovery Act ("RCRA"), 42 U.S.C. §§ 6901, et seq.

Since January 18, 2001, EPA and other local and federal agencies have assisted DTSC with oversight and monitoring at the Site. On March 14, 2001, EPA's Emergency Response Section ("ERS"), San Bernardino County Sheriff's Bomb Arson Squad ("Bomb Squad") and the Bureau of Alcohol, Tobacco, and Firearms ("BATF") identified six containers of highly explosive and shock sensitive tetrazene at the

Site. The agencies determined that the shock sensitive tetrazene should be immediately disposed. This determination resulted in a small removal action. On June 14, 2001, EPA detonated this material on-site.

On May 22, 2002, the State of California DTSC requested that EPA's ERS address the release or threat of release of pollutants and contaminants at the Site. On May 28, 2002, concurrent with DTSC's termination of the facility's RCRA Interim Status TSD permit, the ERS mobilized to coordinate Site stabilization and removal actions.

The Site consisted of two specific areas of concern: the hazardous materials waste storage area ("Hazmat Yard") and the explosives waste and storage area ("Explosives Yard"). Within the Hazmat Yard, EPA identified approximately 750 containers of hazardous substances. ERS inventoried the contents of the Hazmat Yard, sampled and profiled more than 500 containers, consolidated compatible materials, segregated incompatible materials, and manifested and transported the hazardous materials for off-site disposal.

EPA addressed the Explosive Yard in three ways. First, EPA requested owners of the identifiable stored explosive products to collect their property. Second, ERS, the Bomb Squad and the U.S. Marine Corps detonated materials that were determined too unstable to ship. On-site, ERS staged a transportable blasting chamber to conduct 942 detonations over a two-month period. Off-site detonations were conducted by the U.S. Marine Corps at the Air Ground Combat Center - Twenty-nine Palms, California. Third, ERS transported the remaining explosives – more than 10,000 pounds – to Clean Harbors, Colfax, Louisiana for disposal. The entire removal action took 11 months. Costs incurred by EPA are **\$3,414,918.87**. A summary of these costs is enclosed as Attachment A.

The Administrative Record and copies of site-related documents are located at EPA's Regional Office in San Francisco and at the information repository listed below:

Superfund Records Center  
95 Hawthorne Street (4<sup>th</sup> Floor)  
San Francisco, CA 94105

251 West 1<sup>st</sup> Street  
Rialto, CA 92376  
(909) 875-0144  
Attn: Connie Bottini

### Notice of Potential Liability

EPA has spent public funds on actions to investigate and control releases at the Site. Under Section 107(a) of CERCLA, 42 U.S.C. § 9607(a), potentially responsible parties ("PRPs") may be held liable for all costs incurred by the United States Government (including interest) in responding to any release or threatened release of hazardous substances at the Site. Such costs may include, but are not limited to, expenditures for investigations, planning, response, enforcement activities, and oversight of response actions that are performed by parties other than EPA or its contractors. PRPs under CERCLA include current and former owners or operators of the Site, persons who arranged for treatment and/or disposal of hazardous substances found at the Site, and persons who accepted hazardous substances for transport. EPA has evaluated evidence in connection with its investigations and determined that your company arranged for treatment and/or disposal of hazardous substances at the Site. Specifically, EPA has collected copies of RCRA manifests evidencing the shipment of your waste to the Site. A summary of your manifests is located in Attachment B and manifest copies obtained from DTSC in Attachment C.

### Demand for Payment

The total response costs identified through July 24, 2004, for the Site are **\$3,414,918.87**. Due to a proposed recent settlement between EPA and owners/operators of the Site, EPA's unrecovered costs may be reduced by \$640,000. This statement of expenditures is preliminary, and does not limit EPA from providing a revised figure if additional costs are identified. The costs incurred addressing the Hazmat Yard are less than the costs incurred addressing the Explosives Yard. These costs are being segregated by EPA and will be available at the September 16, 2004 meeting. In accordance with Section 107(a) of CERCLA, 42 U.S.C. § 9607(a), demand is hereby made for payment of the above amount plus any and all interest recoverable under Section 107 or any other provisions of law.

Interest on past costs incurred shall accrue from the date of this demand for payment, and interest on future costs shall accrue from the date of expenditure, pursuant to CERCLA Section 107(a), 42 U.S.C. § 9607(a). Interest rates are variable. The rate applicable on any unpaid amounts for any fiscal year is the same as is specified for interest on investments of the Hazardous Substances Superfund which is determined by the Department of Treasury. EPA is not required by CERCLA to issue a written demand for recovery of prejudgment interest. However, the date a written demand is made may be used by a court in determining the date from which prejudgment interest begins to accrue.

### Informational Meeting

EPA invites you to attend an Informational Meeting on Thursday, September 16, 2004 at the below address. A map is included as Attachment E. At this meeting, EPA will present additional information regarding the Site and the methodology used to determine volumetric share as outlined in Attachment D, and open the meeting for questions.

Date: September 16, 2004

Time: 10:00 am to 2:00 pm

Location: Behavioral Health Resource Center

850 E. Foothill Blvd.

Rialto, CA 92376

(909) 421-9200

We have enclosed two lists of the names and addresses of PRPs receiving this letter. Attachment F contains a list of parties noticed for waste sent to the Hazmat Yard, and Attachment G is a list of parties noticed for the Explosive Yard. All parties listed are invited to this meeting. EPA would like to encourage good faith negotiations between PRPs and EPA and between individual PRPs. For settlement negotiations, EPA will not negotiate with each individual PRP. Parties receiving this notice letter should form a group and designate representatives or a Steering Committee to directly negotiate with EPA regarding settlement. Please be aware that liability under CERCLA is joint and several. PRPs may allocate among themselves the costs to be paid by each party to reimburse the EPA for costs incurred at the Site.

### Small Business Regulatory Enforcement Fairness Act

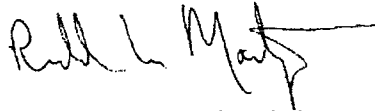

For your information, enclosed in Attachment H is an information sheet intended to inform small businesses of their rights under the Small Business Regulatory Enforcement Fairness Act ("SBREFA") to comment to an Ombudsman about EPA enforcement activity. This information sheet also provides information on compliance assistance available to small businesses. We have included this information sheet without making a determination whether your business is a small business as defined by Section 222 of SBREFA or related provisions.

### Primary Contact Designation Form

To assist the EPA in communications on the Site, please provide the EPA with contact information for the one person who will be the above-named company's or organization's contact for all future communications (including correspondence, informational mailings, etc.) from EPA regarding the Site. Your company or organization may designate a legal or other representative as the primary contact. Please enter "N/A" if the requested information is not applicable to your company or organization. Please return the Primary Contact Designation Form in the self addressed stamped envelope included in Attachment I.

If you need further information, please direct your questions to Thanne Cox, Assistant Regional Counsel, at (415) 972-3908 or cox.elizabeth@epa.gov. Thank you for your attention in this matter.

Sincerely,

A handwritten signature in black ink, appearing to read 'Rich Martyn', with a long horizontal stroke extending to the right.

16 GENERATOR'S CERTIFICATION. I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment, OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

16 GENERATOR'S CERTIFICATION I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment. OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment, OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.
